3. REMARK

- 1) 5G, 10GHz data, test by SPDR method (IEC 61189-2-721).
- 2) SPDR method is taken as internal Dk and Df consistency monitoring. When used for impedance calculation, need to use engineering Dk, which is better for PCB fabricators to use their own test vehicle. The value is about 0.3-0.4 lower than SPDR tested value showed above.
- 3) All the values listed above are for your reference only. Please contact Shengyi Technology Co., Ltd. for detailed information. All rights from this line up are reserved by Shengyi Technology Co., Ltd.;
